

TOWNLEY

Engineering & Manufacturing Co., Inc.

Designed and manufactured with a wear tube of 1/2" Towniprene™ urethane, these heavy duty connectors withstand abrasive and corrosive slurries in suction or discharge service, wherever traditional rigid joints are used.

- Steel spring wire and fabric reinforcement
- Integrated steel nipples
- Not affected by thermal excursions
- Solid arch dampens pump vibration
- Available up to 150PSI
- Available in concentric, eccentric & off-set designs
- Can replace rigid pipe in many applications
- Available with reducing dimensions
- 2" to 84" ID
- Face to face up to 24"
- Continuous wear tube terminates on flange face
- Easily seals misaligned connections
- Ozone resistant cover assures durability
- Excellent for fine-feed

RUBBER PRODUCTS

SERIES 9000 CONNECTOR

Great for sliding abrasion and corrosive feed found in chemical, mineral beneficiation and coal fired power plant use

Replaces rigid connectors to relieve torsional or rotational damage to fixed equipment

Match misalignment in older facilities

Reduce in-plant noise

Call or e-mail us and an experienced Townley Technical Sales Representative will work with you to specify the right connector and options for your application

RUBBER PRODUCTS

SERIES 9000 CONNECTOR

Townley connectors can be constructed in a variety of configurations to suit your application. This is especially helpful when replacing rigid pipe or in older circuits where settling has occurred. Available with single or multiple arch design depending upon movement specifications.

Series 9000 Connectors are especially suited to compensate for torsional, lateral and angular movement as well as elongation and compression normally found in pipe and pumps used mining and power plant transport of slurries
